In-house Production

ABOUT US

Packaging made in-house, end to end

Tayal Vinimay Pvt. Ltd. manufactures HDPE / PP woven sacks and fabrics (laminated and un-laminated), FIBC jumbo bags and LDPE liners for agriculture, fertilizer, food grain, chemical and industrial buyers in India and abroad. Tape extrusion, weaving, coating, printing, liner making and bag conversion all run under one roof in Gujarat, so we control quality and delivery at every step.

CONTENTS

Product Range

01

PP / HDPE Woven Sacks

Laminated, un-laminated & printed

02

FIBC Jumbo Bags

500 – 2000 kg SWL

03

PP Woven Fabric Rolls

Tubular & flat, coated / uncoated

04

LDPE Liner Bags & Sheets

15 – 500 gauge

05

Mulching / Ground Cover

UV-stabilised woven fabric

06

Customisation & Ordering

Printing, options, packing, enquiry

Plant & Machinery

Lohia Lorex 1400

Tape extrusion · 300 MT/month · 192 cheese winders

Lohia Nova 6 Looms

51 circular looms · 15" to 36" tube

J P Extrusion Coating

130 m/min · 180 kg/hr

Lohia BCS

Auto cutting & stitching · 45 bags/min

Shubham LDPE Liner Plant

3 MT/day · 15 to 500 gauge

Roll-to-roll Flexo

Up to 4 colours · 100 m/min

PRODUCT 01

PP / HDPE Woven Sacks

Strong, lightweight sacks from 5 kg to 100 kg. Available plain or laminated, in natural, white or coloured fabric, with up to 4-colour printing. We make them to your size, weight and strength requirements.

- Fertilizer
- Cement
- Food Grain
- Rice
- Sugar
- Flour
- Animal Feed
- Chemicals

Technical Specifications

Material	Polypropylene (PP) / High-density polyethylene (HDPE), virgin grade with filler & additives as required
Filling Capacity	5 kg – 100 kg
Bag Width	15" – 36" (tubular)
Bag Length	As per customer requirement
Fabric Weight	50 – 150 GSM
Mesh (per inch)	8×8 to 14×14
Tape Denier	600 – 1500 D
Lamination	Un-laminated / Laminated (extrusion coated, 15 – 30 GSM), one or both sides
Colour	Natural, White or any colour (as per requirement)
Printing	Plain or up to 4-colour flexo, one or both sides
Top Finish	Hemmed / Cut (heat-cut) / Open mouth
Bottom Finish	Single fold / Double fold, single or double stitched
Add-ons	LDPE inner liner, UV stabilisation, anti-slip, gusset (on request)

Key Advantages

- High tensile strength, low bag weight
- Moisture resistance with lamination / liner
- Bright, sharp branding with flexo printing

Packing

Bales of 500 / 1000 bags, or as per buyer requirement. Export-worthy compressed bales.

PRODUCT 02

FIBC Jumbo Bags

Flexible Intermediate Bulk Containers for storing and moving 500 kg to 2000 kg of powder, granules and bulk material. You choose the filling and discharge style, the lifting loops and the liner.

Fertilizers

Chemicals

Cement

Food Grain

Minerals

Sand

Plastic Granules

Technical Specifications

Safe Working Load	500 kg – 2000 kg
Safety Factor	5:1 (single trip) / 6:1 (multi trip)
Body Type	U-Panel / Circular / 4-Panel
Fabric Weight	140 – 240 GSM
Fabric Type	Coated / Uncoated, UV stabilised
Top (Filling)	Open top / Duffle (skirt) / Filling spout / Flap cover
Bottom (Discharge)	Flat bottom / Discharge spout
Lifting Loops	4 corner loops / Cross-corner / 2 loops
Liner	LDPE loose or form-fit liner (optional)
Colour	White, Beige or as per requirement
Printing	Up to 4 colours, 1 to 4 sides
Accessories	Document pouch, baffles, tie cords, labels (on request)

Key Advantages

- Replaces 20–40 small bags per unit
- Faster filling and forklift handling
- Reduces spillage, labour and freight cost

Packing

Flat-folded in bales or on pallets, as per buyer requirement.

PRODUCT 03

PP Woven Fabric Rolls

Tubular and flat woven fabric from our 51 Lohia circular looms. Supplied coated or uncoated, printed or plain, for bag makers, wrapping and industrial uses.

- Bag Making
- Wrapping
- Geotextile
- Carpet Backing
- Tarpaulin Base
- Shade Nets

Technical Specifications

Material	PP / HDPE
Form	Tubular / Flat (slit) / Gusseted tubular
Width	15" – 36" tubular (up to 72" when slit open)
Fabric Weight	50 – 200 GSM
Mesh (per inch)	8×8 to 14×14
Coating	Uncoated / Coated one or both sides (15 – 30 GSM)
Colour	Natural, White or any colour
Printing	Roll-to-roll flexo, up to 4 colours
UV Stabilisation	Available on request
Roll Length / Weight	As per customer requirement

Key Advantages

- Uniform GSM and tape quality from in-house extrusion
- Consistent roll winding for smooth conversion
- Custom widths and colours

Packing

Rolls wrapped in HDPE fabric / stretch film on paper or PVC core.

PRODUCT 04

LDPE Liner Bags & Sheets

LDPE liners that keep moisture and dust out of woven sacks and FIBCs. Made on our Shubham extrusion line to match your bag size.

Sack Liners

FIBC Liners

Food Grain

Sugar

Chemicals

Fertilizer

Technical Specifications

Material	LDPE / LLDPE blend
Thickness	15 – 500 gauge
Type	Loose liner bags / Tubular rolls / Flat sheets
Size	As per outer bag / customer requirement
Colour	Natural (transparent), milky white or coloured
Sealing	Bottom sealed / Open both ends
Grade	General purpose / Food contact (on request)
Capacity	3 MT per day

Key Advantages

- Moisture and contamination barrier
- Extends shelf life of packed goods
- Size-matched to our own sacks & FIBCs

Packing

Packed in bundles / cartons or inserted in bags, as per requirement.

PRODUCT 05

Mulching / Ground Cover Fabric

UV-stabilised woven ground cover that controls weeds and still lets water and air reach the roots. Made for farms, nurseries and plantations.

Weed Control

Nursery

Plantation

Horticulture

Greenhouse

Landscaping

Technical Specifications

Material	PP woven fabric, UV stabilised
Fabric Weight	70 – 130 GSM
Width	Up to 72" (as per requirement)
Roll Length	As per customer requirement
Colour	Black / Green / Black-White
Features	Water permeable, anti-weed, guide lines on request
UV Grade	As per required outdoor life

Key Advantages

- Cuts weeding labour and herbicide use
- Keeps soil moisture and temperature steady
- Reusable across seasons

Packing

Rolls wrapped in HDPE fabric / stretch film.

MADE TO ORDER

Customisation Options

Printing

Up to 4-colour roll-to-roll flexo, your logo, brand and handling marks

Lamination

Extrusion coating one or both sides for moisture and dust protection

UV Stabilisation

For bags and fabric stored or used outdoors

Size & GSM

Width, length, GSM, mesh and denier to your load

Liners

LDPE liners inserted or supplied separately

Colours

Natural, white or any colour fabric and loops

Quality Assurance

Our quality team tests each batch for **tensile strength, GSM / weight, load carrying capacity, stitching** and **print quality** before dispatch, against the specs you agreed with us.
